

Department of Clinical Oncology [1]

Head of the Department: Professor Stanisław Gózd?, specialist in clinical oncology and radiotherapy.

Contact: +48 41 367 4811

Scientific consultant: Professor Stanisław Gózd?, specialist in clinical oncology and radiotherapy.

We provide treatment at:

- Chemotherapy Unit,
- Chemotherapy Clinic (Outpatient Chemotherapy Clinic)

We conduct diagnosis and systemic treatment of patients with any type of cancer (both solid and systemic). We specialize in the treatment of breast cancer, colorectal cancer, lung cancer, sarcoma, melanoma, Hodgkin's lymphoma.

Within a full-profile systemic treatment of patients we use: cytotoxic drugs (chemotherapy), hormonal drugs (hormone therapy), drugs aimed at specific molecular targets (targeted therapies), drugs stimulating the immune system (immunotherapy). We also conduct cancer treatment in combination with other topical treatments, such as surgery and radiation therapy.

In the Outpatient Chemotherapy Clinic we help patients with once-daily treatment. The Clinic has 44 fully staffed units for administering cytostatic drugs. The Chemotherapy Unit has 44 beds.

We conduct extensive clinical research and cooperate with numerous cancer centers in Poland and abroad in order to improve the effectiveness of treatment.
